CAREER OBJECTIVE

Motivated Computer Science student at Itahari International College with hands-on experience in Core Java, Spring Boot, and RESTful API development. Passionate about building secure and scalable backend systems. Seeking a Java Developer internship or entry-level backend role to apply my skills and grow under experienced mentorship.

EDUCATION

BSc (Hons) Computing — Itahari International College, Nepal	2024 – Present
Higher Secondary Education (+2 Science) — Sushma Secondary School, Nepal	Graduated: 2023

PROJECTS

EcomMed — Medical E-Commerce Backend

Java 21 · Spring Boot · Spring Security · Spring Data JPA · PostgreSQL · Apache Kafka · Flyway

- Built a layered REST API with JWT auth and role/permission-based access control (ADMIN & CUSTOMER).
- Implemented product & category management with dynamic search, price filters, and paginated listings.
- Designed a shopping cart module with real-time stock validation and order placement from cart.
- Integrated Apache Kafka for async processing: inventory deduction, invoice generation, and email notifications.
- Configured Kafka error handler with 3 retries, 2 s backoff, and a central dead-letter topic for failed messages.
- Managed schema migrations with Flyway; documented APIs via Swagger UI with JWT bearer support.

Hospital Management System — Backend

Java 21 · Spring Boot · Spring Security · Spring Data JPA · PostgreSQL · Maven

- Built a REST API managing patients, doctors, departments, and appointments with JWT-based stateless auth.
- Implemented RBAC for three roles (PATIENT, DOCTOR, ADMIN); auto-seeded admin user on startup.
- Designed a User-centric identity model linking Patient and Doctor profile entities to a central User.
- Supported HOD management, doctor-to-department assignment, and paginated patient listings.
- Applied global exception handling for consistent error responses; documented APIs via Swagger UI.

AtomicBank — Online Banking System

Java 17 · Jakarta EE (Servlets & JSP) · MySQL · Maven · jBCrypt

- Developed a full-stack banking application covering account management, KYC, transactions, and card services.
- Built deposit, withdrawal, and fund-transfer features using manual transaction management and row-level locking.
- Secured the app with BCrypt password/PIN hashing, session-based auth, and role-based authorisation (ADMIN/USER).
- Implemented multi-step account creation with KYC workflow and account status lifecycle (Pending, Active, Frozen).
- Built an admin dashboard with banking statistics, account/card-request approvals, and transaction monitoring.

SKILLS

Languages:	Java (Core Java, Java 8, Java 21)
Backend:	Spring Boot, Spring Cloud, Spring Data JPA, Spring Security, Servlets, REST APIs
Database:	PostgreSQL, MySQL
Tools:	Git, GitHub, Swagger, Maven, Postman, Linux, Docker
Soft Skills:	Problem-Solving, Self-directed Learning, Adaptability
